PREFACE

THIS volume, the fourth two-year cumulation of the Industrial Arts Index, covers approximately the years 1924 and 1925. It includes all the periodical references and the 3,330 book titles that have appeared in the current numbers of the Index during this period. The number of the periodicals indexed has been increased from 171 in the preceding cumulation, to 210 in the present volume. These additions are for the most part in the field of business and finance. The periodicals that have discontinued since the last cumulation are: World's Markets, Paper, and Wireless Age. Chemical Age (New York) and Color Trade Journal were merged under the title Chemicals in May, 1925, and the indexing was continued.

The policy of the Industrial Arts Index has been to index closely a selected list of periodicals rather than to index the leading articles only, in a large number of journals, a policy intended to give the small and average-size library the best returns possible on their investment as subscribers.

The members of the diligent staff who have been working faithfully on this publication thru the two-year period are Elsie Schonholtz, Eleanor Whaley and Florence Plimpton. Miss Catherine Murdoch, a later addition to the staff, should also receive grateful acknowledgement for her help in the final compilation.
